PROFESSIONAL PROFILE

Full-Stack Developer and Data Engineer with hands-on experience building scalable web applications (MERN Stack) and optimizing data pipelines for industrial operations. Proven ability to transform raw operational data into actionable insights through automated ETL processes, SQL databases, and real-time analytics dashboards. Eager to contribute to collaborative teams (remote or on-site in Quebec) where continuous improvement, technical precision, and measurable business impact are valued.

WORK EXPERIENCE

Full-Stack Development Engineer

Generation Chile — Providencia — July 2025 – October 2025

- Architected and deployed a MERN stack medical platform centralizing clinical histories, prescriptions, and exams.
- Designed RESTful API with Express.js and MongoDB, implementing role-based access control (RBAC) using JWT authentication.
- Built responsive React frontend with Bootstrap, reducing data access time for physicians by 40%.
- Collaborated in Agile sprints delivering production-ready features every 2 weeks.

Data Optimization Engineer

Consortio Acciona Ossa Pizaroti (Codelco) — Calama — December 2023 – January 2025

- Designed and maintained SQL databases (Oracle 19c) consolidating maintenance records for a fleet of 100+ heavy mining equipment.
- Automated daily KPI reporting (MTBF, MTTR, OEE) using Python and Power Query, reducing manual processing time by 50%.
- Implemented data validation scripts ensuring 99% accuracy in spare parts inventory tracking and budget forecasting.
- Collaborated with operations teams to define data models supporting predictive maintenance strategies.

Systems Coordinator and Fleet Analysis

STP Santiago S.A — Maipú — June 2021 – August 2023

- Developed VBA automation scripts and Python ETL pipelines processing telemetry data for 400+ buses, reducing report generation time by 30%.
- Migrated 5 years of historical maintenance data from legacy Excel files to a centralized SQL database.
- Built interactive Power BI dashboards for executive stakeholders, improving fleet availability metrics by 15%.
- Documented technical processes and trained junior analysts on data extraction methodologies.

TECHNICAL PROJECTS

- **Medical Information Platform:** Full-stack MERN application with authentication, CRUD operations, and responsive UI. GitHub: [Medula-Chile](#)
- **Fleet Data Automation:** Python + VBA scripts extracting, transforming, and visualizing operational data from SAP and Excel sources.

- **Professional Portfolio:** React-based website with Bootstrap 5, showcasing projects and dual profile. GitHub: [brunocho/WEB](#)

TECHNICAL SKILLS

Languages & Frameworks:

- JavaScript (ES6+), Node.js
- React, Express.js, Bootstrap
- Python (Pandas, NumPy)
- HTML5, CSS3

Databases & Data Tools:

- SQL (Oracle 19c, MySQL, PostgreSQL)
- MongoDB (NoSQL)
- Power BI, Power Query
- ETL Pipelines, VBA Macros

Tools & Platforms:

- Git/GitHub, Vite
- RESTful APIs, JWT Auth
- Postman, VS Code
- Linux (Ubuntu), Windows

Methodologies:

- Agile/Scrum
- Test-Driven Development
- Technical Documentation

EDUCATION

Engineering in Machinery, Automotive & Electronic Systems

INACAP — March 2014 – October 2019

Civil Engineering in Computing (2 years completed)

Universidad Tecnológica Metropolitana — March 2012 – March 2014

CERTIFICATIONS

- **Oracle Cloud Infrastructure (OCI) Foundations** — Oracle University (Dec 2025)
- **OCI AI Certified** — Oracle University (Dec 2025)
- **OCI Data Platform** — Oracle University (Dec 2025)
- **Full-Stack JavaScript Developer** — Generation Chile (Oct 2025)

LANGUAGES

English: B2 (Technical documentation and professional communication)

Spanish: Native
